How did the COVID-19 affect the education and daily life for students and how did they overcome?

How did the COVID-19 affect the research and education of faculty members?

17:25-17:30 Closing

OGATA Kazuo Ph.D., Director, Institute of Tropical Agriculture, Kyushu University, Japan

COVID-19 and the Universities of Asia

How Agricultural Universities in Tropics affected and overcome from COVID-19 ?

Purpose & Overview

After the Coronavirus pandemic, people lifestyle has been drastically changed all over the world. These days, news media already reported part of the information how to affect people's life in Tropical Asian Countries, however, we still did not understand and could not reach sufficient information on how university communities affected and how student's/ teacher's lifestyle and teaching style were changed. Particularly agriculture and forestry universities have experiments, practical training, and fieldwork research/ education in rural areas. In this context, there have been various trials and errors in the implementation of education and research.

Therefore, we would like to hold the webinar on how did teachers and student's life change in Tropical Asian countries under the Coronavirus. Understanding the situation of university communities in Tropical Asian countries during the Coronavirus pandemic and considering the way forward to post-Coronavirus.

Invited Speaker

Prof. Dr. Pham Van Cuong

Vice President,
Vietnam National University of
Agriculture (VNUA),
Vietnam

Prof. Dr. Kazi Kamrul Islam

Department of Agroforestry,
Faculty of Agriculture,
Bangladesh Agricultural University(BAU),
Bangladesh

Dr. Saykham Boutthavong

Faculty of Forestry
National University of Laos (NUOL)
Lao PDR

Chair / Moderator

Assoc. Prof. HYAKUMURA Kimihiko
Institute of Tropical Agriculture,
Kyushu University, Japan.

Closing Remarks

Prof. OGATA Kazuo
Director
Institute of Tropical Agriculture
Kyushu University, Japan

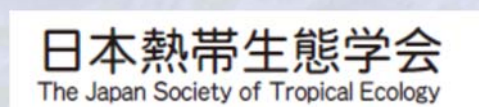

Organized

The institute of Tropical Agriculture, Kyushu University, Japan.

Supported

Japanese Society for Tropical Agriculture (JSTA). Japan Intellectual Support Network in Agricultural Sciences (JISNAS). The Japan Society of Tropical Ecology (JASTE) (alphabetical order)

※ This webinar is supported by Kyushu University Webinar 100 program of the Top Global University project.
